

## Canvas Prints

A canvas print has a natural look that feels like you're staring at the real thing. Below are details that may help you decide whether paying a premium is the right choice for your home.

---

### **Photo Print Quality**

Each photo is printed at the highest resolution to provide exceptional image clarity and vibrancy using state of the art use ink technologies that avoid excessive pixilation and prevent the loss of image quality. Our high resolution and large print sizes make images feel life-like.

### **Gallery Wrap**

Our canvas prints are gallery wrapped, meaning the canvas photo is wrapped around the frame and stapled along the back of the frame so the staples remain hidden. Our gallery wraps are 1 1/2" thick – an elegant look that is much lighter, safer from falls, and perfect for framing.

### **Stretching**

We hand-stretch and gallery wrap each canvas meticulously by applying perfect folded corners onto custom-cut Canadian pine wood stretch-bar frames. Our wood frames derive from renewal forests throughout Canada, adding durability while helping our environment.

### **Mirror Wrap**

Many companies stretch the front of the canvas around the sides. This removes part of the image from the front and ruins the look of the print. We use a mirror wrap technique where the sides of the print are mirrored onto the edges. This keeps the full image on the front.

### **Print Material**

We print on premium quality North American made, matte poly/cotton blend canvas with an authentic texture- the best canvas in Canada and the U.S. Our canvas is also water resistant and can withstand humid environments. This help prevent losing its tension over time.

### **Hanging Accessories**

Each canvas print comes ready to hang out of the box. Our large canvas prints have a heavy-duty picture frame hanging wire hardware installed. For items outside North America, your print is shipped in a tube due to sizing unless a friend can deliver it for you.

### **Weight**

Our canvas prints use a 380 grams per square metre weight to make them smooth and sturdy. This heavier weight provides a beautiful texture with an excellent rendering of colours, enhancing the intensity and emotion in the photograph.

### **Art Protection**

We use an ArtShield UV laminate to protect canvas prints from scratches, fading, and sun damage. This laminate also makes it easier to clean. In tests conducted by Wilhelm Imaging Research, Inc., the canvas, ink and UV laminate results in our prints lasting 200 years.

## **Authenticity**

Protect your investment with our trademarked logo on the back of every print, ensuring you own an original Deep Inspired Print. An original means no scanned copies or mass-produced images. The print you receive is the digital file from the photographer's camera.

## **Size**

We offer two sizes to accommodate different budgets and different sized rooms. These sizes include a 48x32, and 60x40. Our aim is to provide beautiful wall art that inspires you every time you look at it, and that impresses your guests when they come over to visit.

## **Lighting**

Natural light from windows will bounce off a glossy print, making the image look washed out. The direct light on a glossy canvas print makes the image difficult to view because of the reflection. The matte finish on our prints will not have this effect.

## **Pricing:**

48x32: \$550 USD

60x40: \$1250 USD
